LinkedIn: linkedin.com/in/annadanam-vinay-5012b332a | GitHub: github.com/VinayRoyal001

CAREER OBJECTIVE

Entry-level software developer (B.Tech AI & ML, 2026) with hands-on Python, FastAPI, SQL, and REST API experience. Built a full-stack AI chatbot and a CNN image classifier, and completed a Data Analytics internship at Oasis Infobyte. Seeking an Associate Software Engineer or Python Developer role to build clean, maintainable software.

EDUCATION

Bachelor of Technology (B.Tech), Artificial Intelligence & Machine Learning 2022 – 2026
Annamacharya Institute of Technology & Sciences, Tirupati

Intermediate (Class XII) 2020 – 2022
Sri Chaitanya Junior College, Kadapa

Secondary School (Class X) 2014 – 2020
SVR High School, Kadapa

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript
Backend Development: Full-Stack Development, FastAPI, Django, REST APIs, API Integration, SQLAlchemy (ORM)
Frontend Development: HTML, CSS, JavaScript, React, Bootstrap
Databases: MySQL, PostgreSQL, MongoDB, SQLite
AI / Machine Learning: Machine Learning, Deep Learning (CNN), Transfer Learning, NLP, Data Preprocessing, Model Evaluation, TensorFlow, TensorFlow Lite, Keras, PyTorch, Scikit-learn, OpenCV, Google Gemini API
Data Analysis: Exploratory Data Analysis, Feature Engineering, Clustering, Regression, NumPy, Pandas, Matplotlib, Seaborn
Tools & Platforms: Git, GitHub (Version Control), VS Code, Jupyter Notebook, Google Colab, Postman
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, SDLC

INTERNSHIP EXPERIENCE

Data Analytics Intern, Oasis Infobyte (Remote) Jul 2026 – Aug 2026
GitHub: github.com/VinayRoyal001/OIBSIP

- Segmented 1,454 e-commerce customers into four groups (Champions, Loyal, At-Risk High-Value, Regular) using RFM analysis and K-Means (K=4, chosen with the elbow method), and proposed targeted marketing actions for each group.
- Built reusable scikit-learn pipelines (imputation, one-hot encoding) for house price prediction on 2,000 records, compared Linear, Ridge, and Lasso models using MSE, RMSE, and R^2, and analysed residuals and coefficients.
- Documented both projects in Jupyter Notebooks with README files and visualisations (elbow curve, cluster plots, correlation heatmap) using Matplotlib and Seaborn.

PROJECTS

AI Chatbot: Full-Stack Conversational AI Web App Aug 2026 – Sep 2026
FastAPI, SQLAlchemy, SQLite, JavaScript, Gemini API | GitHub: github.com/VinayRoyal001/AI-Chatbot

- Designed and built a full-stack, ChatGPT-style chatbot with FastAPI, SQLAlchemy, and vanilla JavaScript, integrating the Google Gemini API for multi-turn, context-aware conversations.
- Implemented multi-thread conversation management, image and PDF upload with multimodal AI analysis, and persistent chat history in SQLite, using a modular backend that supports swappable database and AI providers.
- Created a responsive light/dark-theme interface with secure API key handling and error handling for invalid input, API failures, and network issues.

Automated Fruit Identification Using CNN Jan 2026 – Jun 2026
Python, TensorFlow, ResNet50V2, OpenCV | GitHub: github.com/VinayRoyal001/Automated-Fruit-Identification-CNN

- Developed a CNN image classification system using ResNet50V2 and transfer learning, achieving 84% Top-1 accuracy across 113 fruit categories.
- Built an end-to-end ML pipeline covering image preprocessing, data augmentation, hyperparameter tuning, and multi-metric evaluation; reduced inference latency by 40% through model quantization.
- Deployed a real-time inference application using TensorFlow Lite and OpenCV, and improved robustness under challenging lighting and occlusion conditions.

CERTIFICATIONS

- The Complete Python Bootcamp From Zero to Hero in Python, Udemy, Oct 2026
- Introduction to Machine Learning: Art of the Possible, AWS Training & Certification, May 2026
- Data Analytics Job Simulation, Deloitte (via Forage), Jul 2026
- Data Analytics Internship Certificate, Oasis Infobyte, 2026
